

ADVANTAGES

- Urethane potting completely encapsulates filter pack within frame
- 99.97%, 99.99% and 99.999% efficiency options available in moisture resistant media
- One-piece seamless or gel gasket options available for leak-free sealing
- High-capacity HEPA filter for critical applications
- 16-gauge galvanized steel frame for durability

Application	Built-up filter banks, rooftops, and air handlers in medical facilities, pharmaceuticals, and clean process manufacturing.
Frame	Galvanized steel
Gasket	Seamless PU foamed gasket
Media	Glass fiber
Separator	Aluminium
Sealant	Polyurethane
Recommended final pressure drop	2x Initial pressure drop
Max Temperature (°C)	80° C, 175° F
Comment	99.97% at 0.3μ to 99.9995% at 0.3μ. Tested in accordance with IEST Recommended Practice for Testing HEPA Filter. UL 900. See Literature 1801XH for more details.
